Team Qi²

Quality in everything we do, Innovation as our added value!

Quality Innovation

Information Technology

Quality Innovation, Inc. (Qi²) specializes in providing Information Technology (IT), Administrative and Project Management professional support service solutions to government and commercial customers. Our Information Technology team provide expert-level consultation and product services in many IT disciplines, advising and interfacing with our customers on a variety of complex issues. Our team consults and implements solutions relating to business, information systems and infrastructure challenges. As a result, our credentialed team is uniquely focused to help any organization or government agency synthesize today's technologies to achieve their missions.

Our IT Team's Core Competencies

Whether it is collaboration tools, content management, business intelligence, virtualized networks, or data center management, Team Qi² has the staff and solutions to meet your needs. The synthesis of diverse technologies is what our team does best!   A few of our core areas include:

Cyber Security Engineering, Software and Testing
• System security engineering and mission assurance / Threat analysis, vulnerability/risk assessments
• Cyber command, control, and situational awareness
• Advanced cyber effects and research
• Network, complex computing, and enterprise security
• Security test and evaluation, penetration testing, Technology Assessments and malware analysis

Information Assurance Technology
• Cryptographic and key management architecture/plans
• Certification and Accreditation (C&A)

Health IT
• Operations & Management / Claims Processing
• Systems Analysis & Design
• Privacy & Security (HIPPA) implementations and audits

Collaborative Portals
• SharePoint, Content management solutions
• Forms, workflows and business application solutions
